Employee Assessment

International Institute of Information Technology (subsidiary of IITC – An OHI Group Company) provides high quality training services to large number of prestigious organizations in the Sultanate of Oman. Our valued customers include organizations both in the Government and in the private sector.

Why choose IITC?

The training institute at IITC today is one of the Sultanate's premium training facilities and is equipped with state-of-the-art equipment and delivery tools. The facility is suitably furnished, lit, serviced and constantly upgraded to ensure it is maintained well and can adapt to changing technological and customer requirements.

IITC offers professional training in a various technologies: Microsoft, Cisco, CompTIA, Oracle, Sun Java, Web Designing and Programming, etc. Our Education Programs and Calendar courses are based on the official curriculums from Microsoft, Cisco, CompTIA, etc. IITC is a **Microsoft Certified Gold Partner for Learning Solution** and **CompTIA Gold Partner (applied for)**. Also, offering complete solution to its customers, IITC also has its own PROMETRIC and VUE Testing centres.

Outstanding Instructors

Our training institute has well trained professionals -certified, experienced and are trained to deliver quality programs to enterprise customers. They possess not only the technical knowledge and qualifications, but also excellent delivery skills. Our trainers constantly receive not only technical training but also communication and delivery training. Training delivery includes the use of case studies and examples during delivery of training programs.

The trainers also from time to time undergo courses at Microsoft and other important organisations. These courses include not just technical courses but also courses in communication, training skills, question and case handling, presentation and training delivery techniques. They are trained to help organisations get the maximum benefit out of corporate training.

Our trainers are capable and have experience in delivering trainings in Microsoft BackOffice products, Microsoft Office applications, Advanced Networking courses, Development tools and databases (Oracle and SQL Server), etc. Official curriculum trainings are delivered by Microsoft Certified Trainers (MCT's) who are certified in different areas of the curriculum. Our trainers are often assigned customer service and support roles that help them acquire practical exposure and in turn ensure that training delivered contains a lot of practical value, real life solutions, and case studies that are extremely useful to attendees.

Customer Satisfaction

The constant upkeep of the facility is of paramount importance and maintenance is scheduled over public holidays and carried out regularly. Moreover, we recognize and immediately act upon feedback received from customers to ensure that our customers continue to receive very high standard of service.

Quality is the key and is maintained at a very high level both in terms of training content and delivery mechanism.

Feedback is the key to the success and effectiveness of any training program. We, through constant pre-training profiling, mid-training reviews and post-training feedback, ensure that the training is imparted at the right level and constantly measures through reviews and quizzes to attendees if the objectives intended are met. This process is a very continuous one and ensures that your investment in time and resources is safeguarded and produces the desired results.
